CURRENT CRYPTO NARRATIVES

MEMECOINS 🐸

Full casino

No utility

No tech fundamentals

Not regulated

Hyper speculative

BITCOIN ₿

Safe haven

Low utility
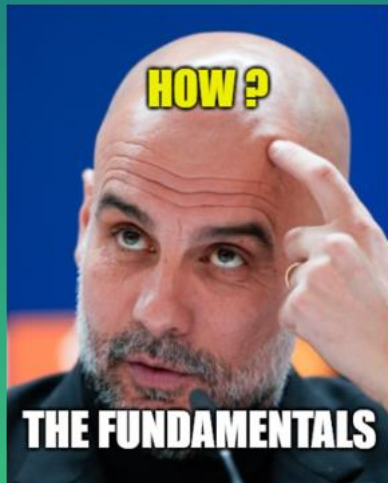

Low tech fundamentals

Regulated

Less speculative

WHAT ELSE ?

Something that revolutionize finance, data management, and digital ownership with innovation and security at its core? To embrace the whole world economy?

The CERTAIN next big thing?

And HOW do you find it?

PEP'S OR JÜRGEN'S WINNING HINT

HOW ?

THE FUNDAMENTALS

HOW ?

THE BASICS

THE CRYPTO TECH FUNDAMENTALS

Decentralisation

REMOVE centralised L1 like Aptos, Klaytn, Ronin, Binance Blockchain, Internet Computer, Flow, Near Protocol, Oasis, Oasys and others for true decentralization

Security

Asset-Oriented protocols over Direct Message Virtual Machines, mitigating multi-billion-dollar losses from hacks and exploits. Remaining L1 : **Aptos, Cardano, MultiversX, Radix, Sui.**

Scalability (linear👈)

For billions of users seamlessly, you NEED a sharded protocol WITHOUT any beacon chain / para chain / coordinator / synchronisator / terminator or Layer 2, that delivers unlimited TPS capacity.

	Aptos	Cardano	MultiversX	Radix	Sui
Sharded	❌	❌	☑️	☑️	☑️
WITHOUT *coordinator*	❌	❌	❌	☑️	☑️

User-Friendly framework

Radix's Scrypto language is even simpler and easier than Sui's MoveVM!

Regulatory compliance

Check this example of a yield-bearing bond with real-world assets, featuring easy configuration, compliance controls, and token creation/distribution using RADIX.

√RADIX

Decentralized ☑
No central points of control, fostering trust and resilience.

Secure ☑
Protect assets, network integrity, preventing hacks and exploits.

Scalable (linearly) ☑
Sharded protocol WITHOUT any parachain / coordinator / Layer 2

User-Friendly framework ☑
Easy to build, test, and safely deploy dApps without deep blockchain expertise.

Regulatory compliance ☑
Designed with real-world assets (RWA) in mind, enabling features like KYC or AML as needed.
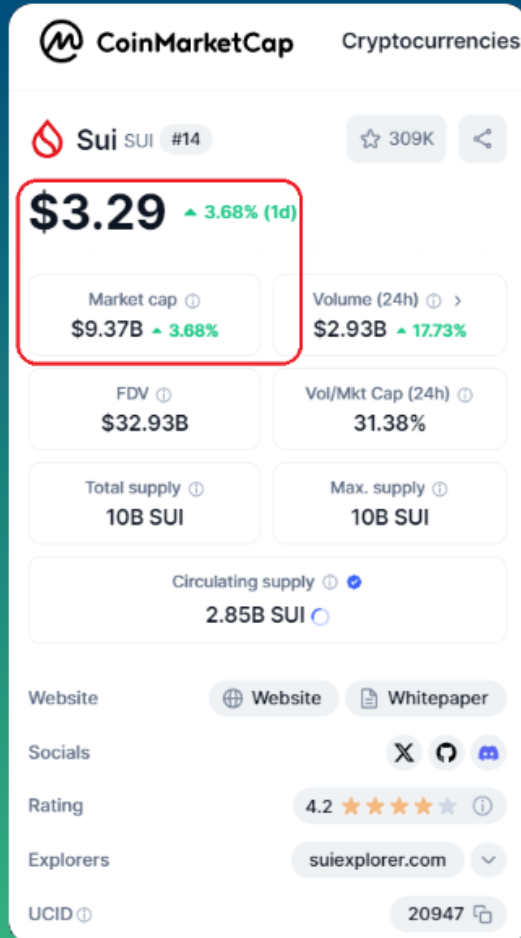

BONUS: Readable UX for normies ☑
What is displayed in your wallet's transaction manifest is what happens
